HAZMAT CONTAMINATED WATER DRY SUIT

Using the latest in chemical and abrasion resistant materials as well as advanced construction techniques the Whites HazMat dry suit offers the user 2 layers of both water and chemical protection. All seams are reinforced, stitched, then heat sealed at over 600°C both inside and out making for an extremely durable and "dry" suit. This construction results in a smooth interior and exterior surface which allows for very easy decontamination of most chemicals. Depending on the divers application and specific needs, the HazMat is available in both Public Safety and Commercial versions.

The HazMat's polyurethane material was chosen for its exceptional resistance towards petroleum based products; the number one thing most professional divers encounter. To ensure diver protection the Hazmat material was tested in more than 22 different industrial chemicals and petroleum products. The same testing laboratory that certifies NFPA products was used for these tests as well as to conduct two other biological tests and extensive abrasion testing. Please

contact Whites Manufacturing for your copy of the test results.

The Hazmat is available with 2 size options; Made to Order (MTO), which is available in 14 standard sizes or Made to Measure (MTM), which is a computer custom cut specific to the users exact measurements. Each of these size options come standard with several important features but are also available with a barrage of installed options to choose from: Attached Hoods, Helmet Yokes, Four different Cargo Pockets, Relief Zippers, Boot/Sock options, Valve placement, and Seal options.

WHITES HAZMAT MULTILAMINATE

Fully sealed chemically resistant polyurethane

Interior and exterior tape welded seams

Tear and puncture resistant nylon core

Outer fully sealed washable, chemically resistant polyurethane layer

SUPERIOR FEATURES...

- Inner and outer protective layers.
- Inner and outer welded seams.
- Anatomically-correct, CAD designed pattern with pre-bent arms, legs and torso for a perfect fit.
